Castor brackets for console pianos 90° offset with brake, length adjustable from 450 to 580 mm

These newly designed castor brackets for console pianos with front piece offset towards the pedals can be easily adjusted over the entire width of the console without protruding beyond its front edge. This lends the castor bracket not only a pleasing appearance but also rules out the risk of stumbling and injuries. The castor brackets are available fitted with small or large twin castors of rubber or plastic depending on the load and floor conditions, thus guaranteeing optimum and easy transport of the piano.

Art. no. 316504 • Castor brackets with twin rubber steering castors, overall height 30 mm

Art. no. 316505 • Castor brackets with twin plastic steering castors, overall height 30 mm

Art. no. 316506 • Castor brackets with big twin rubber steering castors, large, overall height 550 mm

Art. no. 32235

Grand piano spare legs with heavy-duty castors height-adjustable

Whether during repairs to your grand piano or spray-painting, there are many occasions when the original legs have to be replaced by spare legs. The sturdy design of the height-adjustable set of legs and the braked, polyurethane-coated heavy-duty castors makes these newly developed spare legs ideal for universal use.

Overall height 2 x 700 mm / 1 x 820 mm

Piano castors

Galvanised steel with ball-bearing,
polyurethane-coated castors, with plate

These piano castors meet the highest requirements as regards stability under load and spare sensitive floors such as parquet or tiles. The ball-bearing running wheel and live ring guarantee excellent running conditions for even heavy pianos. The soft, polyurethane-coated running wheels avoid pressure marks on sensitive floors.

Overall height 58 mm
