Hammer shank extractor for upright and grand pianos

A quality tool for three different functions. Use the hammer shank clamp in the extractor to easily remove piano hammer shanks from the hammer heads (Fig. 1) and hammer butts (Fig. 2). The additional attachment for grand piano hammer shanks turns the extractor into an effective tool to remove grand piano hammer shanks (Fig. 3).

Toning needle holder with adjustable head

The toning needle holder allows you to vary the free length of the needle by simply turning the needled guide in or out to set the desired head depth.

Art. no. 52198

Key easing pliers

The key easing pliers permit a well-dosed pressing of the key levelling leads into the keys. Exchangeable and width-adjustable pressure plates guarantee the correct insertion of all key levelling leads.
