

## Castors and Accessories for upright and grand piano

Art. no. 315709

Art. no. 315708

### Art. no. 315708 Thread adapter

M16/M22 for the sleeves of concert grand piano castors

### Art. no. 315709 Plastic liners

for grand piano castor pins in various diameters

We try and make replacing grand piano castors as easy as possible for you. Thanks to the thread adapter (M16 to M 22) or plastic liners in various diameters, or according to your specified size, you can avoid complicated peg removal and re-drilling of the grand piano legs.

Art no. 316508

### Castor brackets

for console pianos with double offset,  
6 large rubber wheels, adjustable

This sturdy model with large rubber wheels has been developed in addition to the very popular castor brackets for console pianos with a simple offset. The 3-point bearing for each of the 3 large rubber wheels ensures a form fit of the castor brackets beneath the piano. Particularly suitable for music schools.

**Overall height 55 mm / Length adjustable from 480 - 580 mm**

Art no. 5040701

### PIATTINO - brass base with soundproofing

PIATTINO - the elegantly designed and effectively built brass soundproof base > PIATTINO helps • deaden sound • care for floors • improve the tone and attract attention

Art. no. 32291

### Grand Fallboard brake

Retrofit finger guard for grand pianos

Finger protection - particularly for children - is guaranteed by the retrofit finger guard. The finger guards is designed for all common grand piano key covers between 4-6 kg in weight. Can be fitted in both the side check and key cover. For stability reasons, the finger guard should preferably be fitted in the side cheek.
