**LIFE-SAVER  
WARRANTY EXTENSION KIT**  
Art.-Nr. 76111622

## WARRANTY EXTENSION KIT

### CONFIDENCE

Offer your clients the peace of mind of additional warranty protection.

### SERVICE

Show your clients that you have their best interests in mind by offering this unique product.

### CONVENIENCE

Since installation will take only 10-15 minutes, always have at least one Kit with you to provide on-the-spot upgrades to their Piano Life Saver System. Install the Warranty Extension Kit at your regularly scheduled tuning appointment.

### AFFORDABILITY

At roughly half the price of a new System, the Kit gives the confidence of an additional 5 years of warranty without the cost of a complete System.

Dampp-Chaser Corp. is pleased to announce a new product that your piano owners will love!

The **Warranty Extension Kit** contains a new H-5 Humidistat, a new Low Water Sensor, a new GHM-1 heater bar, a new clean sleeve, Velcro and one set of pads.

The **Warranty Extension Kit** must be installed in a piano that currently has a Piano Life Saver System that is at or nearing the end of the original 5 year warranty period. When this is done, the entire Piano Life Saver System will be warranted for an additional 5 years.

The **Warranty Extension Kit** is designed to be sold at roughly half the price of a full Piano Life Saver System, plus the cost of installation. Installation must be done by a qualified piano technician and should take 10-15 minutes. All existing screws and hardware must be re-used.

The Warranty Extension Kit will extend the original warranty period of the Piano Life Saver System by 5 additional years one (1) time, resulting in a 10 year warranty on the entire Piano Life Saver System. No additional 5 year periods will be extended. Terms and conditions of the warranty are as stated in the original warranty. No other warranties are stated or implied. Dampp-Chaser reserves the right to substitute a similar product should the original no longer be available.
